

NIRANJAN GOVINTHAN

Associate Engineer | Frontend Developer | React | Svelte

Email: niranjan.g2k@gmail.com | Ph: 7904464343 | LinkedIn: Niranjan Govinthan

SUMMARY

Frontend Developer with 4 years of experience building scalable, user-focused web applications using React, Svelte, TypeScript, and modern CSS frameworks like Tailwind. Strong problem-solving skills with hands-on experience in developing interactive dashboards, reusable UI components, and performance-optimized applications. Passionate about writing clean, maintainable code and collaborating with cross-functional teams to deliver impactful digital products.

EDUCATION

Narasu's Sarathy Institute of Technology, salem

B.E Computer Science Engineering

Jun 2017 – Aug 2021

CGPA: 7.3 / 10

SKILLS

Frontend: React js, Svelte, HTML5, CSS3, Javascript, Typescript, Tailwind CSS

State Management: Redux, Zustand

Backend: Node.js

Database: SQL, MongoDB

Tools: GitHub, VS Code, JIRA

INTERNSHIP EXPERIENCE

Alchem Digital – Chennai

Sep 2021 - Nov 2021

React developer Intern

- Built a strong foundation in **frontend development** by working with **HTML, CSS, JavaScript, and React.js** to develop interactive and responsive web interfaces.
- Actively contributed to webpage development through hands-on practice projects, including blog-style applications, improving proficiency in implementing basic UI designs and component-based layouts.

WORK EXPERIENCE

- Contributed to the development of a **JSON-driven dashboard builder platform** that enables users to create and render **real-time interactive dashboards**, allowing non-technical users to configure complex visualizations independently and reducing dependency on developer support.
- Designed and developed **reusable React components using Apache ECharts**, supporting bar, line, pie, and custom charts, which were reused across **multiple dashboards** and helped standardize visualization logic while improving development efficiency and maintainability.
- Integrated and configured multiple **third-party libraries and packages** to enhance visualization capabilities and user experience, enabling richer interactivity, better performance, and a more intuitive dashboard experience across different data use cases.
- Integrated **BackstopJS** for automated visual regression testing, significantly reducing manual UI testing effort, improving test reliability, and speeding up validation of dashboard UI changes during development and releases.
- Refactored and streamlined existing dashboard components and business logic, improving overall application performance, reducing complexity, and making the codebase easier to maintain and extend.
- Developed a **role-based application** to enable secure remote connectivity and authentication across multiple client systems, centralizing access control and simplifying client management while reducing operational complexity through automated authorization workflows.
- Independently developed a **data masking application** that processes large data sets fetched from backend ports based on user-selected inputs. Implemented secure authentication using **Node.js, JWT, and MongoDB**, along with session management to enforce **single-session access** across browsers and devices.
- Revamped and optimized the codebase of a live production application, improving performance, readability, and long-term maintainability while minimizing regression issues.
- Wrote comprehensive **unit and component test cases using Vitest** for a **Svelte-based application**, ensuring code reliability, improving test coverage, and reducing regressions during feature development and releases.

EMPLOYMENT HISTORY

RxDataScience Inc. (a Syneos Health Company)

- **Associate Engineer March 2023 – Present**
- **Associate Software Engineer Trainee**
September 2022 – February 2023
- **Intern June 2022 – August 2022**
